Installation

EN-1090 certified FPC 2+ system. Structural steel constructions must be provided with a CE certificate. Therefore we have an FPC (factory production control) that is certified in accordance with EN-1090-2 by AIB Vinçotte. This gives us an accreditation number to officially provide our steel constructions with CE certificates. Our RWC guarantees professional welding.

VCA certified installation & maintenance department. The currently applicable safety & environmental standards for working in the industry, have become the standard for our installation & maintenance teams.

Speed, flexibility & accuracy are our motivation and a must to earn the trust of our industrial customers.

That's why you choose **Amesco nv**.

INDUSTRIAL CONSTRUCTIONS

Metal Construction

Amesco nv is a **metal construction** company, very strong in constructions and installations for industrial applications. Modern machinery and an experienced team guarantee efficiency and quality.

From concept to realization. Thanks to an in house engineering department, a well-equipped workshop and our own assembly team, we are a total manufacturer for our customers.

Complex customization and series. Many of our constructions are tailor-made solutions, but the modern and polyvalent machinery makes us also competitive for serial work.

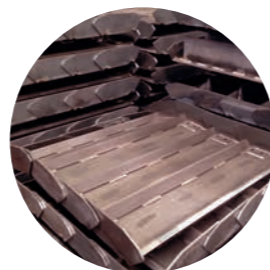

Wear resistant. We have a broad knowledge of wear-resistant steel and are specialized in machining them. By manufacturing parts in these materials or providing hard surface welding, the lifetime can be considerably extended.
